

Exhibit 9

Point of Rediversion C- This is a picture of Rediversion Point C as it leads to Fiock Reservoir #1. The tall, narrow, green vegetation reveals the location of the channel. You can just make Fiock Reservoir #2 out in the distance on the left side of the picture. (The "upstream photo.")

July 28, 2003

Exhibit 10

Cena Reservoir #2- This picture is about the best picture that can be taken of Cena Reservoir #2 due to the overgrowth of tall aquatic vegetation. The reservoir is much larger than what this picture suggests, unfortunately, the rest of the reservoir is inaccessible by land.

Exhibit 11  
Diversion Point D- The view looking upstream to Diversion D.  
July 29, 2003

Exhibit 12  
Diversion Point D- The view looking downstream of Diversion D.  
July 29, 2003

Exhibit 13

Diversion Point E- The tree in the right of the picture indicates where water is collected and diverted into the dark green channel on the right. To the left of the tree is a view "upstream." The water collected at this point is runoff from the Whiskey Lakes Ranch. July 24, 2003

Exhibit 14  
The view looking upstream to Diversion E.
